

Heyco® Screwless Junction Box Connectors

PART NUMBER		DESCRIPTION	MAXIMUM WIRE SIZE UL	MM ²	POLES
Gray	Clear				
9590	9591	SJBC 1620-5	16-20 AWG	1.5	5
9592	9593	SJBC 1620-8	16-20 AWG	1.5	8
9594	9595	SJBC 1418-5	14-18 AWG	2.5	5
9596	9597	SJBC 1418-8	14-18 AWG	2.5	8
9598	9599	SJBC 1418-2	14-18 AWG	2.5	2
9600	9601	SJBC 1418-3	14-18 AWG	2.5	3

- Heyco’s new Screwless Junction Box Connectors are sized to fit popular wire ranges–16-20 ga. as well as 14-18 ga. These sizes are available in popular 2, 3, 5, and 8 pole versions.
- These UL and CSA approved connectors provide a secure and safe connection and permit the use of different gauge wires together. Once installed, wires are gripped firmly using a spring retention feature.
- This snug connection is vibration-proof and eliminates any loose wires and unsafe connections that can occur during shipping and handling. You simply push the solid or tinned CU wire into place and the connection is made, quickly and easily. This simple motion reduces the risk of repetitive motion injuries.
- Their unique design allows for more efficient product assembly flow since, unlike wire nut-type connectors, there is no need for all wires to be in place before individual wires are assembled into the connector.
- Molded of nylon, these connectors are available in either transparent or gray color, have a temperature index of 105°C and are rated to 600 Volts.
- Listed under the Component Program of Underwriters’ Laboratories File # E-80121.
- Certified by Canadian Standards Association File # LR-210961.
