# WELCOME TO IRONCLAD

Ironclad was founded on a construction site in 1998 by Ed Jaeger. Ed noticed that while every specialist utilized dedicated, task specific tools, no one had addressed the special connection between tool and worker. With an extensive background in motorsports, Ed came from a world where glove performance, fit, and comfort were vital. It was at that moment that Ed saw his mission - to create gloves that were both protective and driven by performance, without sacrificing either. Thus was born a new glove technology that incorporated military grade fabrics, with an unrivaled fit and comfort, that would raise the industry to new standards.

With 27 patents & 95 trademarks worldwide and more pending, Ironclad Performance Wear continues to grow and innovate; bringing new technologies to the everyday heroes, the unheralded men and women whom we depend on every single day. It's a mission we are proud of, and strive to deliver everyday.

# IRONCLAD PRECISION

**FOR EXTENDED DURABILITY**

- ✓ MACHINE WASH COLD
- ✓ LINE DRY
- ✓ DO NOT BLEACH
- ✓ DO NOT IRON

INSTRUCTIONS MAY VARY BY STYLE SEE ORIGINAL PRODUCT PACKAGING

## GLOVE CARE INSTRUCTIONS

Most of our products are machine washable. Please note that the washing and care instructions are indicated on the care label inside the glove and may vary by style. For extended durability and comfort, machine wash and hang dry your Ironclad gloves on a regular basis. Machine wash on cool. DO NOT use bleach, machine dry, or use an iron on your Ironclad gloves. Air drying is recommended in order to keep the size consistent with its original form from time of purchase.

## PROPRIETARY FLAWLESS FIT SYSTEM

When it comes to fit, most glove companies stop at 2 measurements per glove – overall length and width. Not Ironclad. Our industry leading Flawless Fit is a proprietary 16-point measurement system that is unique to every one of our glove styles. So what do we measure? Inside index finger length, top of cuff circumference, knuckle circumference, center of palm length, just for starters. 16 measurements left glove, 16 measurements right glove. That's 32 measurements per pair, per size. All with a tolerance measured at 1/10 of an inch. Why do we do it? Because it means our gloves will fit like no other glove on the market. That is the Ironclad Flawless Fit. That is Ironclad.

## GLOVE SIZING

1. Align index finger and thumb as shown
2. Choose the size closest to edge of hand

MEN'S ▶	XS 6	S 7	M 8	L 9	XL 10	2XL 11	3XL 12
	XS 6	S 7	M 8	L 9	◀ WOMEN'S		

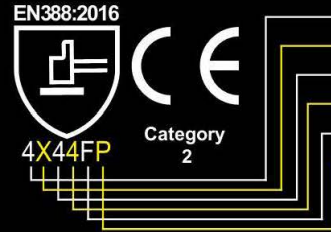

# TESTING & STANDARDS

There are many testing standards that apply to Ironclad work gloves. Below we highlight the three most common standards: EN 388, ANSI 105 and ANSI 138. For each of our gloves that have been tested, the test results will be shown using the standard symbols for each governing body.

## EN:388

Originally developed in Europe, EN 388 has expanded to become the global work glove standard. This standard covers multiple aspects of glove safety, including Abrasion, Cut, Tear, Puncture, and Impact. This standard covers 2 cut tests - the Coup (rotating blade) test and a TDM (straight blade) test. One point to note is that during the Coup test, if the blade is dulled, the glove will receive a rating of "X" for this portion of the standard.

The symbol and how to read it are shown to the right.

TEST	POSSIBLE OUTCOMES
Abrasion	1-4
Coup Cut	1-5, X
Tear	1-4
Puncture	1-4
TDM Cut	A-F
Impact	Pass/Fail

## ANSI 105

Similar to EN 388, ANSI 105 is a common work glove standard that covers many facets of gloves. ANSI testing is predominantly used in North America, but its global presence is growing. The 2 areas that Ironclad primarily tests for are Cut and Abrasion, although the standard also covers puncture, heat, and chemical hazards. The cut test utilizes a TDM (straight) test and returns a score based on the grams of weight that were required for the blade to cut the fabric with 20mm of blade travel.

The symbol and how to read it are shown to the right.

CUT LEVEL	MINIMUM TDM FORCE
A1	200 grams
A2	500 grams
A3	1000 grams
A4	1500 grams
A5	2200 grams
A6	3000 grams
A7	4000 grams
A8	5000 grams
A9	6000 grams

## ANSI 138

Introduced in 2018, ANSI 138 covers a standard specifically for impact gloves. The test is performed by dropping a weight at 18 different impact points across the fingers and knuckles and measuring the forces at each point. The mean of the force is then calculated for each zone (fingers or knuckles) and the lowest mean is used to determine the impact rating for the whole glove.

The symbol and how to read it are shown to the right.

TEST	POSSIBLE OUTCOMES
Impact	1-3

# IRONCLAD PERFORMANCE TESTING

Being on the cutting edge of glove innovation means venturing into uncharted territories. When it comes to evaluating performance, we go above and beyond traditional testing – we partner with scientists, leaders and experts in fields ranging from biomechanics to high tech outdoor gear, and create new ways analyze, evaluate and test performance features of our work gloves. Below we highlight two test methodologies developed exclusively by Ironclad Performance Wear.

## IRONCLAD IMPACT TESTING

In 2010, Ironclad collaborated with the University of Wisconsin – Milwaukee to study impact force reduction, impact testing methods, and the force levels required to break human hand bones. This Ironclad-exclusive test evaluates impact forces across the fingers & thumb, across the knuckles, and at the metacarpal bones (back of hand). Impact forces while wearing a glove are compared to impact forces while not wearing a glove, providing an easy to understand ‘Protection Factor’ at each location on the hand.

The symbol and how to read it are shown to the right.

PEAK IMPACT PROTECTION	
3X	150:50
10X	1000:100
6X	500:75

- Multiplication Factor** - The additional impact protection provided by the glove
- Peak Impact Force** - Required to cause a fracture when wearing gloves
- Peak Impact Force** - Required to cause a fracture when not wearing gloves

## IRONCLAD GRIP TESTING

Ironclad partnered with the design team at Vibram US to develop a method to reliably and accurately measure the ‘Grip Performance’ provided by a pair of gloves. Each Ironclad glove is tested to a modified version of international test standards ISO 13287 and ASTM F2913. We test each glove palm for grip on smooth metal, wet, and oily surfaces. Each glove is evaluated and given a grip rating for each surface, giving you added confidence when choosing gloves for all environments.

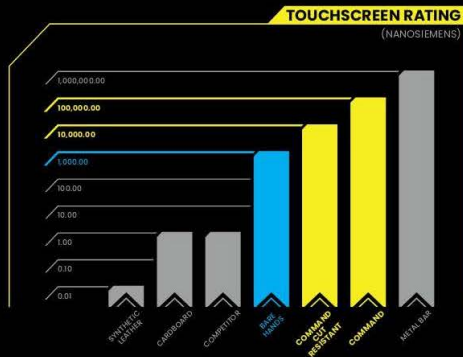

GRIP RATING	
DRY	★★★★★
WET	★★★
OILY	★

# TOUCHSCREEN. REDEFINED FOREVER.

By fusing conductive nanoparticles into the fibers of our synthetic leather, we are able to ensure that not only is conductivity present throughout the entirety of the material, but also that the material stays conductive throughout its lifespan. Our touchscreen won't wear out or wash off like typical touchscreen work gloves.

We put our conductivity to the test as shown in the chart below. The blue line is the threshold for what we considered to be conductive (material that is at least as conductive as a bare hand). It is immediately noticeable that the Command™ gloves not only perform exponentially better than the competition, but they are also significantly more conductive than the human hand itself.

Look for this icon next to any glove that features Command™ touchscreen technology.

## CHOOSING THE RIGHT GLOVE

There are many hazards on a jobsite, so you must consider additional factors when deciding on the right hand protection. Below is a list of important glove features to consider when making that decision. Be sure to analyze ALL hazards, environmental factors, and human interface requirements at each jobsite and workplace. These include:

**Grip** - a critical factor for all tasks, the right grip will help prevent objects from slipping & slicing hands, and significantly reduce hand fatigue.

**Touchscreen** - with the proliferation of paperless workplaces and mobile devices, workers must be able to use touchscreen devices without removing their gloves. This will greatly enhance hand safety compliance.

**Impact** - in heavy industries, impact hazards are everywhere. Make sure that hands are protected from cuts as well as impacts to the fingers, knuckles, and metacarpal bones with a glove from the KONG® glove line.

**Abrasion Resistance** - working in highly abrasive environments can dramatically weaken cut resistant gloves. Choose a glove with high abrasion leather and a full 360° cut liner, such as Ironclad's ULD-IMPC5.

**Chemical Resistance** - knit gloves with only a palm coating will not protect users from hazardous chemicals. Choose a fully coated glove, such as the Ironclad KCHA5, when working with caustic and corrosive chemicals.

**Cold Environments** - working in cold environments or cold storage can cause loss of dexterity and even frostbite. Choose a cut resistant glove with sufficient insulation.

**Heat Resistance** - when handling hot objects, it is important to consider the fiber composition of the glove. HPPE can melt under high heat, so choose a heat-rated glove made from aramid fibers such as DuPont™ Kevlar®.

### COLOR CODED CUT RATINGS

≤ A1

**Low cut hazard jobs:**  
Packaging, Warehousing, Lawn Care, Gardening, General Purpose

A2

**Low to medium cut hazard jobs:**  
Packaging, Warehousing, Automotive, Cold Storage

A3

**Medium cut hazard jobs:**  
Material Handling, Construction, Paper Production, Drilling, Workover

A4

**Medium to high cut hazard jobs:**  
Manufacturing, Construction, HVAC Work, Metal Fabrication

A5+

**High cut hazard jobs:**  
Metal Stamping, Scrap Metal Handling, Recycling, Glass Handling

#### 360° Cut Resistance

Look for this icon next to any glove that features a full 360° cut resistant liner.

# KONG®

Designed in conjunction with the Oil & Gas Safety Committee, our patented KONG® impact protection is designed to help protect against various impact situations. Through extensive testing with the University of Wisconsin, we have determined the optimal combination of materials to greatly reduce the effect of impacts; thus ensuring that your hands are safe. Our patented impact protection reduces impacts by up to 90%\*, turning breaks into bruises.

## 85%

### Ergonomic Metacarpal

Our patented metacarpal TPR design reduces impacts by up to 85%\*, while allowing for full range of motion & dexterity.

## 90%

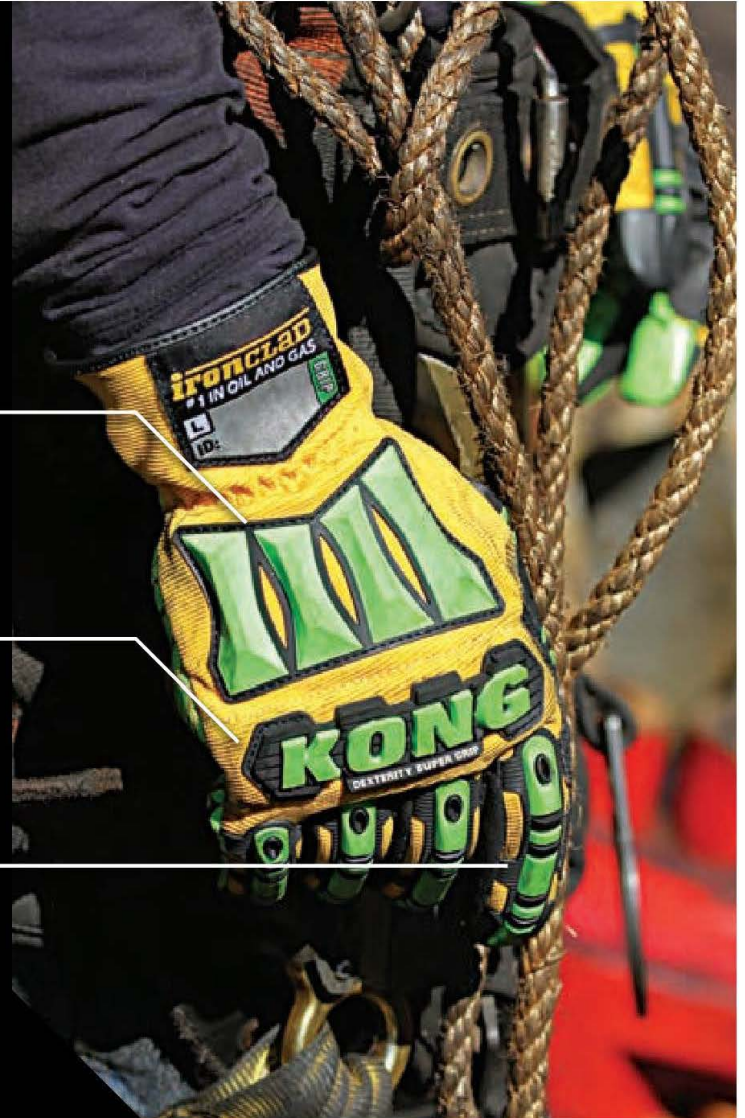

### Triple Padded Knuckle

By combining TPR protection and gel foam padding, KONG® impact protection reduces knuckle impacts by up to 90%\*.

## 66%

### Patented Fingertip Protection

Our patented angled fingertip design extends all the way to the tip of the finger and reduces impact by up to 66%\*.

High Visibility isn't simply a matter of using fluorescent colors, but also the environment in which it is being used. Built using a patented high visibility impact design, IVE™ maximizes hand and finger visibility at a distance through increased contrast, brightness, fluorescence, and pattern recognition. Knowing where your hands are is the first step in avoiding impacts and associated injuries.

**PATENTED IVE™ FINGERTIP DESIGN**

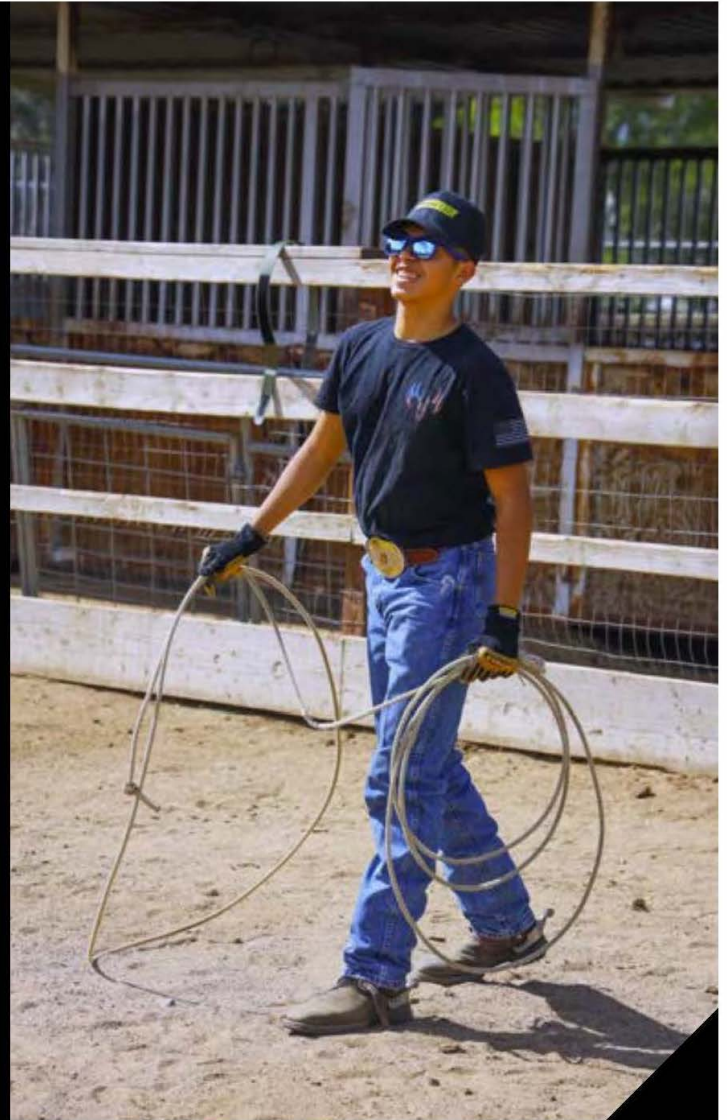

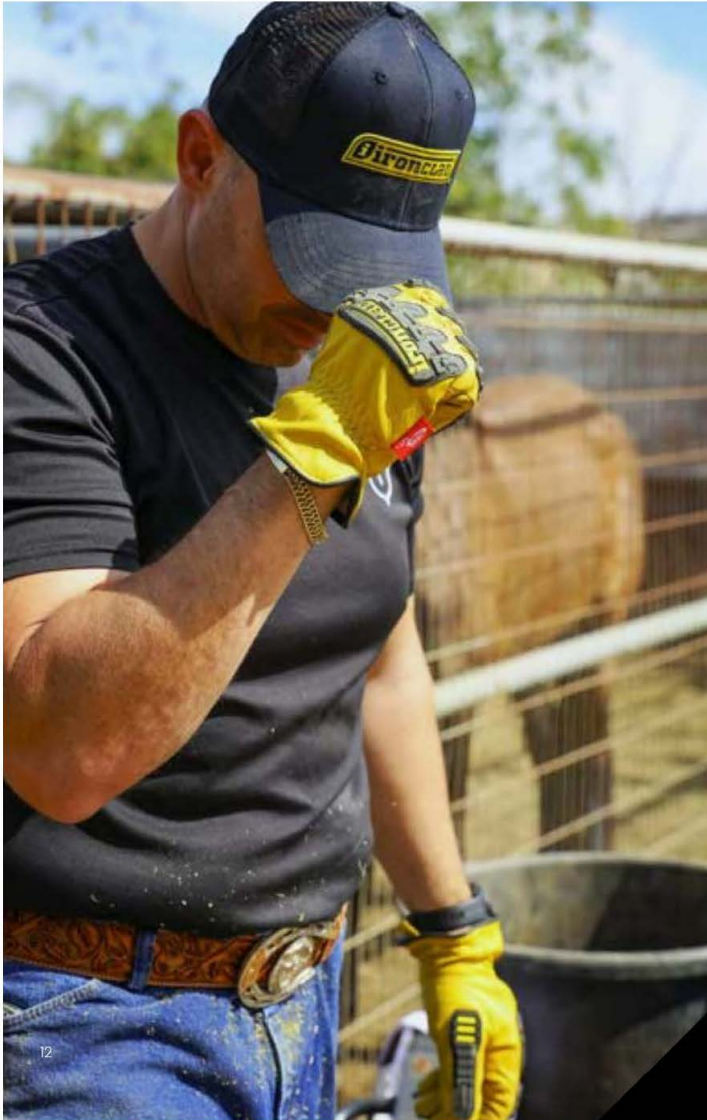

Our unique hazard stripe finger tips are designed to make fingers instantly recognizable, allowing for faster reaction times in avoiding potential hand impact hazards.

**PATENTED IVE™ BACK OF HAND**

Our unique but familiar pattern is easily recognizable at a distance, even when dirty or in low light environments, improving overall hand awareness and safety.

Look for this icon next to any glove that features Ironclad Visual Engineering technology.

## ALL IN A DAY'S WORK

Being a cowboy was a lifelong, but distant, dream for Jesus Verdiel. Not only because it was a stark contrast from his city life, but also because he knew how demanding it would be to maintain a ranch.

But, his heritage was in ranching, and when he started his own family and his young sons began to share that dream of living a cowboy life, he decided it was time to make it a reality. Fast forward 10 years, and what started out as ranch with a few animals has now grown to a stable of horses, pigs, goats, chickens and turkeys.

Jesus takes great pride in watching his boys learn the value of hard work while caring for the animals. Along with their favorite animals and chores, everyone has their own favorite Ironclad gloves for protecting their hands at the ranch. While it's true the work never ends and requires multiple hats, with no days off, he truly enjoys the peace that country life brings.

It's this dedication to follow and live out his dream, while facing all of the daily challenges it brings, that make Jesus #IamIronclad.

## WORLD'S FIRST NFPA 2112 FLASH FIRE RATED GLOVE

Introducing the first glove in the world to pass NFPA 2112:2018 certification for flash fire protection. Built upon Ironclad's award-winning Heatworx® glove chassis with Dupont™ Kevlar® and Nomex® yarns, this glove also provides maximum dexterity while handling hot items up to 600°F (315°C). A Revolution in Hand Protection.

Workers in hazardous locations that are at risk for lethal flash fire exposure - such as chemical processing plants, petrochemical refineries and drilling platforms - are required to wear FR garments certified to NFPA 2112:2018 for protection in the event of a flash fire incident. Up until now they had no options for flash fire certified hand protection. Now they can be fully protected with the Heatworx® Heavy Duty FR glove.

## A TEAM PLAYER

A 14-year Law Enforcement veteran, Tommy Perez has always understood the meaning of teamwork. Before joining the force, he was a professional Baseball player, and later worked in Real Estate, only to realize, "he didn't like sitting behind a desk, and true fulfillment came from helping people."

After recruitment, Tommy worked his way up the ladder to become a Detective, and part of a Tactical (SERT) Team. There he would find his calling, working with good people, who support each other.

Each day brings its own challenges and hazards, and requires a dependable pair of gloves. Ironclad gloves give Tommy the confidence to meet routine tasks as well as take decisive action in high-stress situations. Knowing they're 'well-constructed' makes his job easier.

Whether it's Baseball or Tactical, what he enjoys the most is being a part of a TEAM. That is what it means to be an officer, and it is why Tommy is #IamIronclad.

**Ironclad**  
GAMING GLOVES

## THE WORLDS FIRST ESPORTS GLOVES DESIGNED WITH PRO GAMERS

At Ironclad we take a very deep dive into a specific job, task, or trade when creating a new line of gloves - so when we approached the idea of building an esports glove, we partnered with two of the best teams in the industry - MIBR & Immortals - to learn more about the specific demands and requirements of premier esports athletes. Our product development team met with the athletes, analyzed their techniques, studied their gaming equipment, and worked closely with them on making a pair of gloves that could make them more efficient, more precise, and more comfortable during long gaming sessions.

Our team investigated how people sweat under different environments and how we could mitigate that sweat, keeping hands dry so they could grip better when needed. We studied ways to improve hand movement and control, while keeping an emphasis on finger mobility. This months-long process resulted in two radically new glove designs, both of which manage excess moisture, improve gaming performance, and provide much-needed consistency throughout an entire match or practice session.

At Ironclad we don't just design gloves - we study the human hand, meet with Industrial Athletes to observe their tools and environment, and devote ourselves to helping them perform at a higher level each and every day.

## ALL HANDS ON DECK

On board a mighty machine, alive with mechanical sounds, gliding effortlessly down the Mississippi River is a normal day at the "office" for Teran McDonald, a crewmember of a river towboat.

Not one to shy away from a challenge, Teran jumped at the opportunity to join the towboat crew and give his family a more stable life. As long as commerce flows on the river, towboats are on duty to help guide the river traffic.

When Teran joined the towboat crew, he started out as a Deck Hand with tasks that included hauling, rigging and laying wires to painting/washing the vessel. Being a towboat crewmember is physically demanding, and Teran is a big champion for Ironclad gloves among the crew. He is now in an engineering program to learn how to repair and maintain ship engines and has his sights on one day becoming a Chief Engineer.

Teran's commitment to his job, and professional growth, to provide for his family is what makes him #IamIronclad.

# KONG<sup>®</sup>

PRO

## THE NEXT GENERATION KING OF OIL N' GAS

Since 2008, no glove has protected more hands of oil and gas professionals than the legendary KONG<sup>®</sup> Original. Now there's a new champ, ready to dominate for the next decade: The KONG Pro. Utilizing the same globally patented impact protection as the KONG Original, the KONG Pro is designed with cutting-edge materials and construction techniques, resulting in unmatched features across the board – cut resistance, durability, dexterity and visibility. The KONG Pro delivers greater protection in a lighter chassis, with no hand fatigue.

### LIGHT WEIGHT, HIGH STRENGTH PALM

Only two layers thick, yet stronger than ever before. A newly developed, light weight outer layer provides excellent grip and ANSI level 5 abrasion resistance. The inner layer, a proprietary blend of DuPont™ Kevlar<sup>®</sup> and UHMWPE fibers, delivers EN 388 cut level F and ANSI A6 cut resistance. This new palm is both lighter and stronger, delivering maximum protection and excellent dexterity.

EXO2-MWR

### PRODUCT FEATURES

- ▶ Water-Resistant Synthetic Suede Palm
- ▶ Breathable Polyester Knit Back of Hand
- ▶ Neoprene Knuckle Impact Protection
- ▶ Terry Cloth Sweat Wipe

## EXO™ PRO REINFORCED

S - 2XL

EXO2-MPRE

### PRODUCT FEATURES

- ▶ Reinforced Synthetic Suede Palm
- ▶ Breathable Polyester Knit Back of Hand
- ▶ Neoprene Knuckle Impact Protection
- ▶ Terry Cloth Sweat Wipe

## EXO™ PRO LEATHER REINFORCED

S - 2XL

EXO2-MLR

### PRODUCT FEATURES

- ▶ Leather Reinforced Synthetic Suede Palm
- ▶ Breathable Polyester Knit Back of Hand
- ▶ Neoprene Knuckle Impact Protection
- ▶ Terry Cloth Sweat Wipe

## EXO™ PRO HI-VIZ ABRASION

S - 2XL

EXO2-HZA

### PRODUCT FEATURES

- ▶ Duraclad® Reinforced Synthetic Suede Palm
- ▶ Hi-Viz Polyester Back of Hand
- ▶ Neoprene Knuckle Impact Protection
- ▶ Reflective Knuckle Panel
- ▶ Terry Cloth Sweat Wipe

## EXO™ GRIP

S - 2XL

EXO2-MGG

EXO2-PGG

### PRODUCT FEATURES

- ▶ Silicone Infused Synthetic Suede Palm
- ▶ Breathable Polyester Knit Back of Hand
- ▶ Neoprene Knuckle Impact Protection
- ▶ Terry Cloth Sweat Wipe

## EXO™ PRO LEATHER (GREY)

S - 2XL

EXO2-MOL

## EXO™ PRO LEATHER

S - 2XL

EXO2-MPLG

EXO2-MPLW

### PRODUCT FEATURES

- ▶ Goatskin Grain Leather Palm
- ▶ Breathable Polyester Knit Back of Hand
- ▶ Box Fingertips with Leather Nail Guard
- ▶ Neoprene Knuckle Impact Protection
- ▶ Terry Cloth Sweat Wipe

### PRODUCT FEATURES

- ▶ Goatskin Grain Leather Palm
- ▶ Breathable Polyester Knit Back of Hand
- ▶ Neoprene Knuckle Impact Protection
- ▶ Terry Cloth Sweat Wipe

## EXO™ PRO LEATHER DEERSKIN

S - 2XL

EXO2-MPLD

### PRODUCT FEATURES

- ▶ Deerskin Grain Leather Palm
- ▶ Breathable Polyester Knit Back of Hand
- ▶ Neoprene Knuckle Impact Protection
- ▶ Terry Cloth Sweat Wipe

## EXO™ PRO LEATHER COWHIDE

S - 2XL

EXO2-MPLC

### PRODUCT FEATURES

- ▶ Cow Grain Leather Palm
- ▶ Breathable Polyester Knit Back of Hand
- ▶ Neoprene Knuckle Impact Protection
- ▶ Terry Cloth Sweat Wipe

## EXO™ MECHANICS LEATHER

S - 2XL

EXO2-MLG2

### PRODUCT FEATURES

- ▶ Goatskin Grain Leather Palm
- ▶ Breathable Polyester Knit Back of Hand

## EXO™ IMPACT

S - 2XL

EXO2-MIG

EXO2-PIG EXO2-MIGB

EXO2-MIGR

### PRODUCT FEATURES

- ▶ Reinforced Synthetic Suede Palm
- ▶ Breathable Polyester Knit Back of Hand
- ▶ TPR Impact Protection
- ▶ Terry Cloth Sweat Wipe

## EXO™ IMPACT HI-VIZ

S - 2XL

EXO2-HZI

### PRODUCT FEATURES

- ▶ Reinforced Synthetic Suede Palm
- ▶ Hi-Viz Polyester Back of Hand
- ▶ TPR Impact Protection
- ▶ Terry Cloth Sweat Wipe

## EXO™ IMPACT LEATHER

S - 2XL

EXO2-MGL

### PRODUCT FEATURES

- ▶ Reinforced Goatskin Grain Leather Palm
- ▶ Breathable Polyester Knit Back of Hand
- ▶ TPR Impact Protection
- ▶ Terry Cloth Sweat Wipe

**EXO™ INSULATED LEATHER**

S - 2XL

EXO2-HVIP

EXO2-MWEL

**EXO™ MIG WELDER**

S - XL

**PRODUCT FEATURES**

- ▶ Pig Grain Leather Palm
- ▶ Wind-Resistant Polyester Pack of Hand
- ▶ Ribbed Knit Cuff
- ▶ Polyester Liner with Foam Insulation
- ▶ TPR Impact Protection
- ▶ Reflective Knuckle Panel

**PRODUCT FEATURES**

- ▶ Cow Split Leather Palm
- ▶ Cow Split Leather Back
- ▶ Cotton Liner
- ▶ Reinforced Palm and Thumb
- ▶ Wing Thumb Designed Specifically for MIG Welding
- ▶ Welted Seams with DuPont™ Kevlar® FR Thread

## EXO™ GRAIN WELDER

S - XL

EXO2-MWELC

### PRODUCT FEATURES

- ▶ Cow Grain Leather Palm
- ▶ Cow split Leather Back
- ▶ Cotton Liner
- ▶ Reinforced Palm and Thumb
- ▶ Wing Thumb Designed Specifically for MIG Welding
- ▶ Weltd Seams with DuPont™ Kevlar® FR Thread

## COTTON FACE MASK

ONE SIZE

ICFMC

### PRODUCT FEATURES

- ▶ Two-Layer Design Provides Washable Durability
- ▶ Cotton/Polyester Blend Outer Lining
- ▶ 100% Cotton Inner Lining for Comfort and Breathability
- ▶ Low Profile, Contoured Shape
- ▶ Stretch Ear Loops Provide Secure Fit
- ▶ One Size Fits Most Faces

10 REUSABLE WASHABLE

## NYLON COOLING FACE MASK

S/M - L/XL

ICFMN

### PRODUCT FEATURES

- ▶ Two-Layer Design Provides Extended Durability
- ▶ Poly/Spandex Outer Lining Delivers Flexible Fit
- ▶ Nylon/Spandex Inner Lining – Comfort, Cooling & Moisture Wicking
- ▶ Face Contoured Pattern Enhances Fit
- ▶ Available in Two Sizes, S-M and L-XL

10 PACK REUSABLE WASHABLE

## CUSTOM FIT FACE MASK

ONE SIZE

ICFMCF

### PRODUCT FEATURES

- ▶ Two-Layer Design Provides Extended Durability
- ▶ Silver Treated Antimicrobial Polyester Outer Lining
- ▶ 100% Cotton Inner Lining for Comfort and Breathability
- ▶ Adjustable Nose Bridge
- ▶ Adjustable Ear Loops
- ▶ Sold in 2 Packs

2 REUSABLE  
WASHABLE

## KNEELING PAD

M09030

### PRODUCT FEATURES

- ▶ 1" Thick Durable Oil Resistant Foam Padding
- ▶ Waterproof Construction
- ▶ Integrated Handle
- ▶ Beveled Edge with Printed Safety Stripes
- ▶ 21" x 14" x 1"

# ACCESSORIES

## LED WORK LIGHT

MI2040

### PRODUCT FEATURES

- ▶ 3 Lighting Modes: 100%, 50% & SOS/Flash
- ▶ Ultra Bright COB LED with 100,000+ Hours Lifetime
- ▶ Rechargeable via USB Cable with Battery Level Indicator
- ▶ High Efficiency Circuitry Provides Maximum Output Throughout Battery Life
- ▶ Rugged, Shock-Resistant Construction, Designed for Indoor & Outdoor Use
- ▶ Multi-Position Folding Stand
- ▶ 1/4-20 Thread Mount
- ▶ CE ROHS Approved

## FOLDABLE LED WORK LIGHT

MI2050

### PRODUCT FEATURES

- ▶ 3 Lighting Modes: 100%, 50% & SOS/Flash
- ▶ Ultra Bright COB LED with 100,000+ Hours Lifetime
- ▶ Rechargeable via USB Cable with Battery Level Indicator
- ▶ USB Power Bank for Recharging Devices
- ▶ Foldable Body for Different Lighting Angles & Flat Storage
- ▶ High Efficiency Circuitry Provides Maximum Output Throughout Battery Life
- ▶ Designed for Indoor & Outdoor Use
